Located in Switzerland, the University of Bern is international to the core with top-class academics, research and a comprehensive range of courses in a location of outstanding beauty.

Committed to excellent teaching and research, its study programs and disciplines range from the sciences to the humanities and beyond.

Our University is ranked among the world's Top 100 with achievements resonating globally. Its internationally acclaimed strengths in research include climate science, space exploration, medicine and sustainable development.

The University's international nature is amply reflected in the diverse backgrounds of the people working, studying, teaching and researching at our institution. Students come from more than 120 nations, while half of our professors joined us from highly reputable universities outside of Switzerland.

All campus buildings are located centrally in the heart of the Swiss capital, Bern, with easy transport links across town and to the rest of Switzerland and Europe.
